

Comment 05-235

It is of my opinion that the current requirement for morse code is no longer beneficial to the amateur radio art. As digital and new digital technologies have far surpassed the performance and need for the "spark gap" transmissions of yesteryear. Morse code should be left to the operator who desires to use it. not as a required mode of communications.

I Request the FCC Promptly move forward and remove the morse Code requirement as soon as humanly possible.

Thank You for your time
